AUDIO-VISUAL MATERIALS

Included in this list are charts, films, filmstrips, illustrations, recordings, etc., which have been listed in the journals CINAHL indexes.

3M, Surgical Products Division: Blind insertion of a Sampson Curved Intramedullary Rod (18 min, 16mm film, 3/4" videocassette) **ORTHOP NURSE** 1983 May-Jun; 2(3): 52
Shoulder prosthesis for 4-part fracture (16 min, 16mm film, 3/4" videocassette) **ORTHOP NURSE** 1983 May-Jun; 2(3): 52
Total knee joint replacement (20 min, 3/4" videocassette) **ORTHOP NURSE** 1983 May-Jun; 2(3): 52
The UPF universal proximal femur prosthesis-insertion technique (19 min, 16mm film, 3/4" videocassette) **ORTHOP NURSE** 1983 May-Jun; 2(3): 52

Abbott Laboratories: Talking with the geriatric patient: communication in patient care series (videotape, 35 min) **NURS TIMES** 1983 Mar 9-15; 79(10): 38-9

ACCESS Alberta: Design for independence (1982, 6 videotapes, color, 30 mins each) **REHABIL LIT** 1983 May-Jun; 44(5-6): 163

Accountability and the phases of management (25 min, color, film, instructor's guide) Available from S-N Publications, Inc (Poulin MA) **AORN J** 1982 Dec; 36(6): 957

Adelphi University Center on Aging: Love and learn (3/4" video cassette/color/10 min) **AM HEALTH CARE ASSOC J** 1983 Mar; 9(2): 55

An adolescent group: social springboard for personal growth (33 min, color, videocassette, 1982) Available from Documentaries for Learning (Mason EA) **COMMUNITY MENT HEALTH J** 1982 Winter; 18(4): 298-9

Adria Laboratories, Inc: Help yourself — tips for teenagers with cancer (booklet, 40-minute cassette) available from National Cancer Institute 1982 **CANCER NURS** 1983 Aug; 6(4): 317-8

Age Concern England: Managing a wheelchair (slides with written commentary) **HEALTH SOC SERV J** 1983 Jan 6; 93(4828): 29

Allied Corporation: Housekeeping: a matter of attitude (16 min, film, workbook) **OCCUP HEALTH NURS** 1982 Nov; 30(11): 46
See the little picture (9 min, film, workbook) **OCCUP HEALTH NURS** 1982 Nov; 30(11): 46
Show you know it (11 min, film, workbook, sound, color, 16 mm, 3/4" videocassette, Betamax or VHS) **OCCUP HEALTH NURS** 1982 Nov; 30(11): 46

American College of Emergency Physicians: Emergency management of the multiply injured patient. Available from Abbott Laboratories, Audio-Visual Services **OCCUP HEALTH NURS** 1983 Feb; 31(2): 44

American Hospital Association: Fire in the patient care facility: blueprint for survival (3/4" and 1/2" video-cassette) **AORN J** 1983 Feb; 37(2): 182

American Lung Association: Superstuff **J SCH HEALTH** 1982 Nov; 52(9): 566

AORN: Understanding the operating microscope (138 slide/sound program, 30 min) **AORN J** 1982 Nov; 36(5): 752

APPCOR Productions: Anesthesia, your baby and you (51 min, color, 3/4" U-Matic, 1/2" VHS, 1/2" Beta) (Pue AF) **PERINATAL PRESS** 1983; 7(4): 58-9

Arthritis: basic information (slide/tape, 12 1/2 min) Available from Arthritis Foundation **PHYS THER** 1982 Nov; 62(11): 1654

Audio Visual Nurse Training: Planning nursing care (tape/slide) part 1 **NURS MIRROR** 1983 Jun 22; 156(25): 33

Audiovisual Nurse Training Library: Basic observations A: temperature, pulse, respiration (cassette tape, slides) **NURS TIMES** 1982 Nov 17-23; 78(46): 1946
Storage, custody and administration of drugs (NT16, tape 15 min, slides, VAT) **NURS TIMES** 1983 Jun 15-21; 79(24): 37

PAMPHLETS

PAMPHLETS

Some of the pamphlets listed here are, strictly speaking, more than pamphlets, yet we list them here since they appear in lists so titled in the journals indexed.

3M, Surgical Products Division: Asepsis and draping for surgery **ORTHOP NURSE** 1983 May-Jun; 2(3): 52

3M's Medical Products Division: TENS bibliography **OCCUP HEALTH NURS** 1983 Jan; 31(1): 44

Accommodating the disabled student 1981 (Mueller J) **PHYSIOTHERAPY** 1982 Nov; 68(11): 377

Administering health block grant programs: report of a seminar. Available from Institute for Health Planning **PUBLIC HEALTH REP** 1982 Sep-Oct; 97(5): 499

Adult physical fitness 1980 (# 148K) Available from Consumer Information Center **PATIENT CARE** 1982 Oct 15; 16(17): 103

AFL-CIO Public Employee Department: Hospital workers: who cares about your health on the job? **ARIZ NURSE** 1983 Mar-Apr; 36(2): 14

AIMS Secretary: Denial of parents' rights in maternity care **MIDWIVES CHRON (SUPPL)** 1983 May; 96(1144): 167

All about glaucoma — questions and answers for people with glaucoma (Leydecker HCW, Crick RP) **PHYSIOTHERAPY** 1983 Feb; 69(2): 52

American Academy of Facial Plastic and Reconstructive Surgery: Facts about plastic surgery of the ear **HEALTH** 1983 Feb; 15(2): 58
Facts about plastic surgery of the nose **HEALTH** 1983 Feb; 15(2): 58
How to select a cosmetic facial surgeon **HEALTH** 1983 Feb; 15(2): 58
Treatment of common facial skin blemishes and lesions **HEALTH** 1983 Feb; 15(2): 58

American Cancer Society: Danger **PHYSICIAN ASSIST** 1983 Jul; 7(7): 126
The decision is yours **PHYSICIAN ASSIST** 1983 Jul; 7(7): 126
Facts on lung cancer **PHYSICIAN ASSIST** 1983 Jul; 7(7): 126
Fifty most often asked questions about smoking and health... and the answers **PHYSICIAN ASSIST** 1983 Jul; 7(7): 126
If you find a lump in your breast... **OCCUP HEALTH NURS** 1983 Jan; 31(1): 44
Listen to your body **PHYSICIAN ASSIST** 1983 Mar; 7(3): 152
Mammography — saving more lives **OCCUP HEALTH NURS** 1983 Jun; 31(6): 45
Questions and answers about pain control (#4518-PS) 1983 **ONCOL NURS FORUM** 1983 Summer; 10(3): 120
Quit smoking. The lives you save... could be theirs **PHYSICIAN ASSIST** 1983 Jul; 7(7): 126
Safeguarding your heart during pregnancy **PHYSICIAN ASSIST** 1983 Jul; 7(7): 126
Safeguards against cancer **HEALTH** 1982 Sep; 14(9): 22
Smoking and heart disease **PHYSICIAN ASSIST** 1983 Jul; 7(7): 126
Stay healthy! Learn about uterine cancer **OCCUP HEALTH NURS** 1982 Nov; 30(11): 43
Strategic withdrawal from cigarette smoking **PHYSICIAN ASSIST** 1983 Jul; 7(7): 126
Tabacco and health **PHYSICIAN ASSIST** 1983 Jul; 7(7): 126
What every woman should know about high blood pressure **PHYSICIAN ASSIST** 1983 Jul; 7(7): 126
Why patients seek unproven cancer remedies: a psychological perspective **OCCUP HEALTH NURS** 1983 Mar; 31(3): 44

INTRODUCTION

The 1983 GUIDE TO CINAHL SUBJECT HEADINGS lists all the terms currently used to provide subject access in the CUMULATIVE INDEX TO NURSING & ALLIED HEALTH LITERATURE. A number of changes were made in the 1983 list to expedite plans to offer computerized access to CINAHL in the near future. The most fundamental change has been the addition of tree numbers to each heading; these numbers yield a hierarchical listing that is invaluable for both manual and computer searching.

We are indebted to the staff of the National Library of Medicine, not only for their development of the MeSH "tree structures—to which we owe a great deal—but also for their support of our project to construct similar hierarchies for CINAHL. In fact, many of the CINAHL trees are condensations of comparable MeSH trees. Others, however, may bear little resemblance to their MeSH counterparts. Most of the radical differences occur in the E, G, I, L, M, and N categories and reflect the nursing and allied health focus of CINAHL.

Tree numbers are not all that is new in 1983. Four other important changes have been made. The first concerns the handling of syndrome names. In the past, syndrome headings were taken as needed from Magalini's DICTIONARY OF MEDICAL SYNDROMES, but were never included in the List of Subject Headings. As of now, all allowable syndrome headings are printed in the Subject Heading List. If a specific syndrome heading does not exist, the indexers tag the next most appropriate headings which define the individual diseases or symptoms that make up the syndrome.

The second area of change affects the indexing of organizations as subjects. In the past, organization names were generated as needed. As with syndromes, they were not included in the subject heading list. For 1983, a few major organization names have been authorized as subject headings in the thesaurus, e.g., RED CROSS. All others are indexed under the appropriate main heading with the subheading "/organizations", e.g., DIABETES/organizations or CRITICAL CARE NURSING/organizations.

The third area of change involves the addition of many more precoordinated headings. The most important examples resulted from the elimination of two old CINAHL subheadings: "/diseases" and "/neoplasms." In effect, many new precoordinated disease and neoplasm headings were authorized as replacements. In 1983, subject headings will show LUNG NEOPLASMS and not LUNG/neoplasms or LIVER DISEASES and not LIVER/diseases.

Lastly, a significant number of new terms have been added—approximately 20% of the entire thesaurus. This reflects not only the addition of many new precoordinated headings and very current headings, but also the expansion of our subject coverage. The areas most affected are physical therapy, administrative management, and health sciences librarianship. You can easily see these changes by scanning the E2, E7, L1, and N4 trees.

A number of criteria were used to determine which new headings should be added and what form they should take. Specificity and currency were the rule of thumb for identifying new headings. In the past, several CINAHL headings were used to index more than one concept. With the 1983 revision, new terms were added to cover each concept. For example, the old CINAHL heading ORIENTATION was replaced by two more specific headings EMPLOYEE ORIENTATION and PATIENT ORIENTATION. For decisions about the form of a term, we consulted a number of print authorities, including *Mesh* for the A-D categories, *DSM-III* for the F3 category, and AHA's *Hospital Administration Terminology* for parts of the M and N categories. (A complete list of the printed authorities consulted appears at the end of this section.) For terms too up-to-date to appear in the printed authorities, we looked to the journal literature to identify the most common form.

*Medical Subject Headings in INDEX MEDICUS

ALPHABETIC LIST

The Alphabetic List contains all CINAHL subject headings and their cross references arranged in alphabetical order. Citations will be found in the subject section of CINAHL only under the headings that appear in large type. All other entries are cross references leading the user to authorized CINAHL headings.

Cross references are of two types:

- 1) "See" references refer from terms not used to valid CINAHL headings. In most cases, the term referred from is synonymous to the preferred term. The references appear in lower case and the preferred CINAHL term in upper case, e.g.,

Bonding, Parent-Infant see PARENT-INFANT BONDING

The "x" symbol listed under a valid CINAHL heading indicates a backwards see reference, e.g.,

PARENT-INFANT BONDING

x Bonding, Parent-Infant

- 2) "See also" references indicate related CINAHL headings which generally do not appear in the same tree, e.g.,

HOSPITALIZATION

see also

CHILD, HOSPITALIZED

The "XX" symbol indicates a backwards see also reference, e.g.,

CHILD, HOSPITALIZED

XX HOSPITALIZATION

Each heading is followed by one or more alphanumeric codes (tree numbers) which direct the user to the place(s) in the Tree Structure List where the term is to be found. A \$ preceding the tree number indicates either that the heading does not also appear in MeSH or that it appears in a different position within the MeSH tree structures. A plus sign following the tree number indicates that there are additional terms indented under that heading in the tree structure.

Two different types of notes may appear in the thesaurus record:

- 1) The date 1983 identifies terms added to the thesaurus in the 1983 revision.
- 2) Scope notes provide brief definitions of headings that may be unclear and/or explain the use of subheadings. Many new scope notes were added to facilitate use of the index.

The following is a complete sample entry from the Alphabetic List:

TRANSFER, INTRAHOSPITAL

\$N2.421.353.485.867

1983

Formal transfer of an inpatient, usually during a single hospitalization, from one nursing care unit, clinical service, or attending physician to another.

TRANSPORTATION OF PATIENTS

x Intrahospital Transfer

XX TRANSPORTATION OF PATIENTS

TREE STRUCTURES

The tree structures list all the CINAHL headings in a subject hierarchy. The trees are composed of 14 broad categories (e.g., Category A=Anatomy) most of which are divided further into subcategories (e.g., Subcategory A7=Anatomy-Cardiovascular System). The CINAHL terms in each subcategory are arranged hierarchically according to their alphanumeric codes (tree numbers) from the most general to the most specific. Each CINAHL term appears in at least one place in the trees and may appear in as many additional places as are logically appropriate.

CINAHL indexers routinely use the most specific headings available to represent indexable concepts. For example, articles on nurse practitioners working with the elderly will be indexed only under the specific heading GERONTOLOGIC NURSE PRACTITIONERS. They will *not* also appear under the general term NURSE PRACTITIONERS. The CINAHL user who neglects to look up the heading NURSE PRACTITIONERS in the trees may easily miss the more specific, relevant headings indented underneath it.

Since CINAHL does not make see also references between headings that appear in the same tree, examination of the tree structures is the only way to identify many specific headings of interest. Any CINAHL heading that has been assigned a tree number followed by a plus sign should be looked up in the trees since there will be specific headings indented beneath it. CINAHL users may also consult the trees to find additional subject headings that express related concepts, whether at the same level, or at higher or lower levels of specificity.

In the tree structures, each term is followed by a number that indicates its position in the hierarchy. It may also be followed by one or more additional numbers in smaller type that indicate other tree locations for the same heading. These cross reference tree numbers are truncated to the third level.

The trees also contain some terms that are designated (NON-CINAHL). These are included solely for the purpose of clarifying the logical structure of the tree. They are *never* used for indexing and do not appear in the subject section of CINAHL.

The following is a sample section from the tree structures:

SUBHEADINGS

Topical Subheadings: There are 39 topical subheadings (or secondary headings) that can be linked to CINAHL main headings to increase the specificity of indexing. These subheadings help to group together articles on a particular aspect of a topic. Not all subheadings can be used with all main headings; for example, the subheading /prevention and control is meaningless linked to the main heading NURSING PROTOCOLS. The subcategories of main headings with which a particular subheading can be combined are identified in parentheses in the list that follows at the end of this section.

As with the thesaurus itself, there have been a number of changes in CINAHL's subheadings for 1983. Twenty new subheadings were added, three have simply changed form, and five were deleted (see list at end of section for details). The two major deletions — /diseases and /neoplasms — probably have had the most far-reaching consequences. In the past, these two subheadings would have to be linked with an anatomical main heading to completely describe a clinical entity. Now there are precoordinates main headings that accomplish this task more efficiently, for example, LUNG NEOPLASMS instead of LUNG/neoplasms or LIVER DISEASES instead of LIVER/diseases. An alphabetic list of topical subheadings follows:

*ABNORMALITIES - Used with organs for congenital defects. (A, except A10-12 & A16)

ADMINISTRATION - Used for administrative structure and management. (I2, L, N2-N4)

ADMINISTRATION & DOSAGE - Used with drugs for dosage forms, routes of administration, frequency and duration of administration, quantity of medication, and the effects of these factors. (D)

ADVERSE EFFECTS - Used with drugs, chemicals, and manufactured products for undesirable reactions occurring in normal usage or accepted dosage. Also used for adverse effects or complications of diagnostic, therapeutic, anesthetic, surgical, or other procedures. (D, E, R4, G3, H, J)

ANALYSIS - Used for the identification or quantitative determination of a substance or its constituents. Includes urinalysis, blood analysis, and cerebrospinal fluid analysis, chemistry or chemical composition of an organ or drug. (A, B not B2, C4, D, G3, J)

ANATOMY & HISTOLOGY (was ANATOMY) - Used with organs, regions, and tissues for normal descriptive anatomy and histology. (A, not A11-A12)

*CHEMICALLY INDUCED - Used with diseases, syndromes, abnormalities or symptoms caused by chemical compounds. (C, F3)

*CLASSIFICATION - Used for taxonomic or other systematic or hierarchical classification systems. (B-N)

*COMPLICATIONS - Used with diseases to indicate conditions that co-exist or follow. (C, F3)

DIAGNOSIS - Used for all aspects of diagnosis and assessment, including physical examination and prognosis. Excludes screening for which "prevention & control" is used. The subhead "radiography" is used for radiographic diagnosis. (C, F3)

*DIET THERAPY - Used with disease headings for dietary nutritional management. (C, F3)

*DRUG EFFECTS - Used with organs, regions, tissues, or organisms and physiological and psychological processes for the effects of drugs. (A, B not B2, F1-F2, G4-G11)

DRUG THERAPY - Used with disease headings for the treatment and prevention and disease by the administration of drugs or chemicals. (C, F3)

ECONOMICS (was FINANCE) - Used for the economic aspects of any subject, including all aspects of financial management and fund raising. (C, E, F3-F4, G1-G3, I, J, L, N2-N4)

EDUCATION - Used for education and training in various disciplines and of various classes of persons. (C, E, F, G1-G3, H-M, N)

EDUCATION, CONTINUING - Using for continuing education in various disciplines and of various classes of persons. (C, E, F, G1-G3, H-M, N)

EDUCATION, GRADUATE - Used for graduate education in various disciplines and of various classes of persons. (C, E, F, G1-G3, H-M, N)

***EQUIPMENT & SUPPLIES** - Used with diagnostic or therapeutic procedures of specialties/disciplines for the development, utilization, or modification of apparatus, instruments, or equipment. (E except E7, F2, F4, G1-G3, H, J, L)

***ETIOLOGY** - Used with diseases for causative agents; includes microorganisms, environmental and social factors, personal habits, genetics, etc. (C, F3)

EVALUATION - Used with non-disease headings (e.g., behavior mechanisms, physiological processes, programs, disciplines, classes of persons, facilities, and services) for evaluation and assessment. (E, F1-F2, F4, G2-G12, I2, L, M, N)

HISTORY - Used for the historical aspects of any subject. (C-F, G1-G3, H-N)

INJURIES - Used with anatomic headings for wounds and injuries. (A, not A11, A12, A16)

***LEGISLATION & JURISPRUDENCE** - Used for laws, statutes, ordinances, government regulations, legal controversy, and court decisions. (C-F, C1-G3, H-J, L-N)

***MANPOWER** - Used with disciplines and programs for the demand, supply, distribution, recruitment and use of personnel. (F4, G1, G2, H-J, L, N2-N4)

METHODS (was PROCEDURES & TECHNIQUES) - Used with technics, procedures, and programs for methods. (E, except E7, F4, G1-G3, H-J, L-N)

***ORGANIZATIONS** - Used with disciplines and classes of persons for associated organizations, societies, agencies, etc. (C, G2, I-12, K-M, N2)

PHYSIOLOGY - Used with organs, tissues and cells for their normal function. Also used with physical processes. (A, G7-G11)

PHYSIOPATHOLOGY - Used with organs, tissues, cell structures, and disease states for disordered function. (A, C, F3)

***PREVENTION & CONTROL** - Used with disease headings for increasing disease resistance, control of transmission agents, prevention and control of environmental hazards, and prevention and control of social factors leading to disease. (C, F1, F3, G3, I1)

***PSYCHOSOCIAL FACTORS** - Used with diseases, technics, and named groups for psychological, psychiatric, psychosomatic, social, behavioral and emotional aspects. (C, E except E7, F3, G2, I1-I2, M, N1-N2)

***RADIOGRAPHY** - Used with organs, regions, and diseases for x-ray examinations. Includes radionuclide imaging. (A, C)

***RADIOTHERAPY** - Used with disease headings for the therapeutic use of ionizing radiation. (C)

***REHABILITATION** - Used with disease headings and surgical procedures for restoration of function of the individual. (C, E4, F3)

***STANDARDS** - Used with facilities, personnel, programs, and services for the development, testing, and application of standards of adequacy or acceptable performance. Used with chemicals or drugs for standards of identification, quality, and potency. Includes health or safety standards in industries or occupations. (D, E, F4, G1-G3, H-J, L, N)

***SURGERY** - Used for operative procedures on organs, regions, or tissues, for the treatment of disease. (A, C, F3)

***THERAPY** - Used with diseases for therapies other than drug therapy, diet therapy, radiotherapy, rehabilitation or surgery for which subheadings exist. Also used for articles dealing with multiple therapies. (C, F3)

*TRANSPLANTATION - Used with organs, tissues, or cells for transplantation. (A)

*TRENDS - Used for the manner in which a subject changes with time, whether past, present, or future. (C, E, F3-F4, G1-G3, I, L, N)

*UTILIZATION - Used with equipment, programs, facilities, and services for discussions of how and how much they are used. (E, F4, G1-G3, H-J, L, N)

*New CINAHL topical subheadings

DELETED TOPICAL SUBHEADINGS

Bibliography (now a descriptor)

Diseases (now precoordinated headings)

Facilities (now precoordinated headings)

Neoplasms (now precoordinated headings)

Statistics (now a descriptor)

TERTIARY HEADINGS:

A second group of subheadings exist that are called the tertiary headings. They are distinguished from the topical subheadings (or secondary headings) in two ways. First, they can either be linked directly to a CINAHL main heading OR they can be linked to the end of a main heading/topical subheading combination. For example:

REHABILITATION NURSING/Great Britain or REHABILITATION NURSING/Education/Great Britain.

And secondly, they can be used in combination with any CINAHL main heading as appropriate.

These tertiary headings fall into two basic subcategories—age groups and geographic headings. The only exception is the tertiary heading/in pregnancy, which functions just like the age group headings. A complete list, by subcategory, follows:

AGE GROUPS

IN ADOLESCENCE - Used for occurrence during adolescence, 13 to 18 years.

IN ADULTHOOD - Used for occurrence during adulthood, 19-44 years.

IN INFANCY & CHILDHOOD - Used for occurrence during infancy and childhood, birth to 12 years.

IN MIDDLE AGE - Used for occurrence during middle age, 45-64 years.

IN OLD AGE - Used for occurrence during old age, 65 years+.

IN PREGNANCY - Used for occurrence during pregnancy.

DESCRIPTORS

For 1983, CINAHL has established a number of additional descriptors. These parenthetical statements generally indicate the form of the article indexed (anecdote, editorial, research, etc.) or the presence of some sample form or data (exam questions, pictorial, statistics, etc.). In a citation, the descriptor appears in parentheses after the author's name. Generally, no more than two descriptors will be assigned to one article. A complete list follows:

ANECDOTE (indicates article is a brief narrative often informal in tone)

BIBLIOGRAPHY (indicates bulk of the article is a bibliography—i.e., a list of books, journal articles, AVs, etc., on a topic or by a specific author. For articles about preparation of or use of bibliographies see CINAHL main heading: BIBLIOGRAPHY.)

CARE PLAN (indicates presence of a care plan—i.e., a plan developed to ensure consistent care of an individual patient. For articles about preparation of or use of care plans see CINAHL main headings: NURSING CARE PLANS or PATIENT CARE PLANS.)

CARE STUDY (indicates article is a care study—i.e., a review of a particular disease or condition including general history, diagnosis and intervention as well as data specific to an individual patient. For articles about preparation of or use of nursing care studies see CINAHL main heading: NURSING CARE STUDIES.)

CASE STUDY (indicates article is a case study—i.e., a thorough review of an administrative problem, with data specific to a particular setting.)

COMMENTARY (indicates article is a commentary—i.e., a comment on a previously written article)

EDITORIAL (indicates article is an editorial)

EXAM QUESTIONS (indicates article includes sample exam questions. For articles about the preparation of or use of examinations see CINAHL main heading: **EDUCATIONAL MEASUREMENT**.)

FORMS (indicates article includes sample(s) of forms. For article about the preparation of or use of forms in general see CINAHL main heading: **DOCUMENTATION**.)

PICTORIAL (indicates article includes substantive photographs or pictures)

QUESTIONNAIRE (indicates article includes sample(s) of questionnaires. For articles about the preparation of or use of questionnaires see CINAHL main heading: **QUESTIONNAIRES**.)

RESEARCH (indicates article is substantive in nature—includes data collection, methodology, discussion of results, etc. For articles on how to conduct research or the value of research, etc., see CINAHL main headings: **RESEARCH**; **RESEARCH, MEDICAL**; **RESEARCH, NURSING**.)

RESPONSE (indicates article has been written in response to a commentary)

STATISTICS (indicates article contains substantive statistical data. For articles about the collection or preparation or use of statistics see CINAHL main heading **STATISTICS**.)

HEADINGS
WITH
PREVIOUS
INDEXING**

These subject headings represent concepts that are new to the CINAHL Thesaurus as well as concepts that were previously indexed under different (usually broader) CINAHL headings. If the heading in the "previously indexed under" column still exists, it is printed in upper case letters. If the heading has been deleted and is no longer a legitimate CINAHL term, it appears in lower case.
